

Space Planning Recommendations

- Benches

Effective space planning is essential to creating inviting and functional outdoor environments. Drawing on our extensive experience, we've compiled these space planning recommendations to help guide your placement of Maglin benches.

Please consult local codes and regulations to ensure compliance and best outcomes for your project.

Recommendations for bench spacing scenarios.

- When in a row, at least 24" between the front and the back of benches for access and leg room.
- When in a row, at least 36" between bench ends for accessible walkway.
- When on the sides of a walkway ensure at least 96" remain for ease of transit.
- At least 30" from the front facing high traffic areas for comfortable leg room.
- At least 60" between furniture and any entrances for ease of access.
