

# Space Planning Recommendations

## - Bike Racks

Effective space planning is essential to creating inviting and functional outdoor environments. Drawing on our extensive experience, we've compiled these space planning recommendations to help guide your placement of Maglin bike racks.

Please consult local codes and regulations to ensure compliance and best outcomes for your project.

Recommendations for bike rack spacing scenarios.

- Allow at least 36" between bike racks and walls or edges for ease of use and access.
- Allow at least 36" side-to-side between individual bike racks for ease of use and access.
- Allow at least 72" front-to-back between individual bike racks for ease of use and access.
