

Space Planning Recommendations

- Tables & Chairs

Effective space planning is essential to creating inviting and functional outdoor environments. Drawing on our extensive experience, we've compiled these space planning recommendations to help guide your placement of Maglin tables and chairs.

Please consult local codes and regulations to ensure compliance and best outcomes for your project.

Recommendations for table and chairs spacing scenarios.

- Allow at least 18" (36" for wheelchair access) between backs of seats and walls or edges.
- Allow at least 24" (36" for wheelchair access) between backs of seats for adequate walkways.
- Allow at least 32" to be considered a single seat space for wheelchairs.
- Allow at least 60" between furniture and any entrances for ease of access.
