

# Blox

## Strength you can sit easy with

Blox is proof that even the strongest forms can make space for softness. Inspired by brutalist architecture, Blox combines durable materials with angular shapes and a seat that's genuinely comfortable.

## Blox gives brutalism space to breathe

Stools provide an individual seating option in high-use public settings. Arrange them in clusters or alongside benches to create sturdy silhouettes that feel open, not imposing.

### Crafted for comfort

Comfort doesn't have to be complicated. Blox's wide planks are shaped into a subtle concave that invites rest, recovery, and everything in between.

### Bold geometry meets material integrity

Purposeful, geometric lines frame wide Douglas Fir wood planks responsibly harvested from the Pacific Northwest. The result is a striking contrast of modern blockiness and natural warmth.

## Strength, comfort, and flexibility boxed up

Backless, backed, and stool configurations come in your choice of left-to-right (LR) or front-to-back (FB) slats

Blox's all-steel frame is raised off the ground with stainless steel feet to prevent dragging damage

Backed and backless benches are available with or without arms

Maglin's superior coating helps prevent rusting

## Distinctive Beauty

Douglas Fir wood features a warm, reddish-brown to yellow-tan heartwood with pronounced, straight, or cathedral grain patterns that add character to outdoor spaces.

## Powdercoat Colors

\*Also available in fine textured powdercoat
