

720 Collection

Experienced together.

Outdoor spaces are experienced through a sequence of moments—arrival, movement, pause, gathering and rest. The 720 Collection brings seating, tables, bike parking, waste and recycling, bollards and planters into one coordinated family. Each product plays a distinct role. Together, they shape places that feel considered from beginning to end.

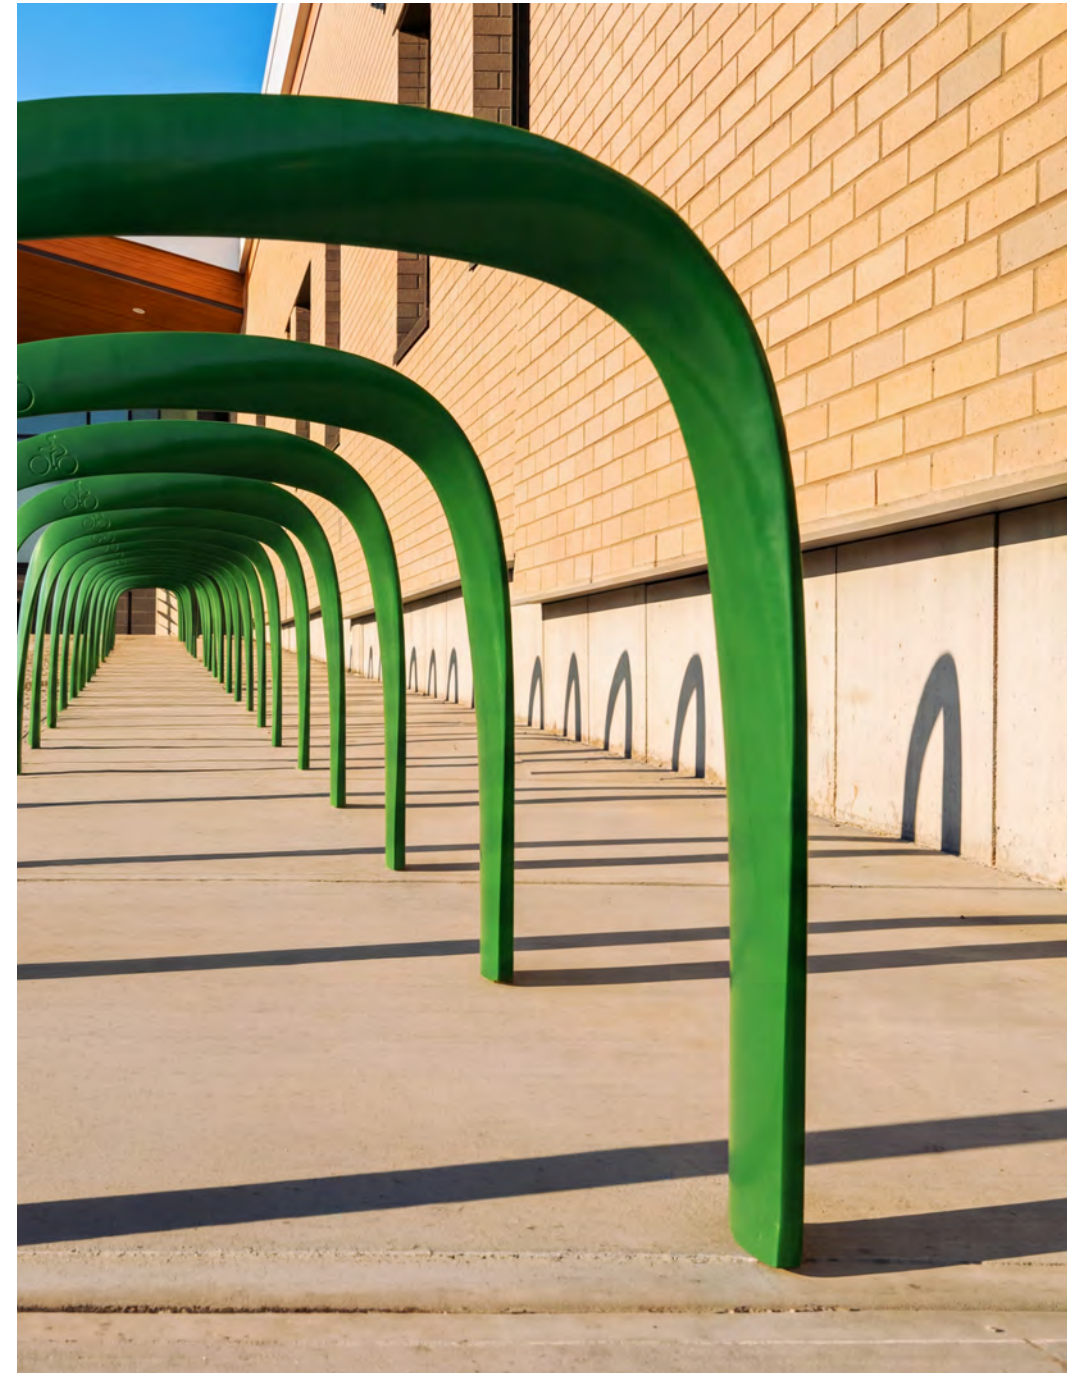

Welcome

A place to begin.

Arrival is the first experience of any destination. Crafted from cast aluminum, the 720 Bike Rack unites durability and refined design together in a form that feels at home across campuses, civic spaces, commercial developments and mixed-use environments. Its restrained architectural presence establishes a considered first impression while supporting the everyday rhythm of the site.

720 Bollards

Guide

Structure without distraction.

Movement through a landscape is shaped by subtle cues. The 720 Bollard defines pathways, protects pedestrian areas and brings clarity to circulation without competing with its surroundings. A restrained profile and warm material expression create definition without visual interruption.

720 Benches

Pause

Comfort, thoughtfully placed.

Every landscape needs places to pause. The 720 Bench creates comfortable places for rest, observation and conversation, with backed, backless and cantilevered configurations suited to a range of applications. Along a pathway, beneath a canopy or at the edge of a lively plaza, it offers an invitation to slow down and take in the surroundings.

720 Tables and Benches

Gather

Made for time together.

From casual meals and outdoor study to conversation and collaboration, the 720 Table and Bench collection creates a natural setting for time spent together. Coordinated seating and table configurations support gathering across education, healthcare, workplace and civic environments, adding comfort and utility to spaces designed for everyday connection.

720 Lounge Chairs

Settle in

A place of one's own.

The 720 Lounge Chair offers a more personal scale to the outdoor environment. Supportive proportions, single and double configurations create comfortable settings for conversation, reading or a quiet moment alone. Used independently or arranged in groups, each chair establishes a distinct destination within the larger landscape.

Accessible Wood Double Lounge Chair with Center Arm

720 Chaise Lounges

Unwind

Some moments call for a longer pause.

The 720 Chaise Lounge introduces a more relaxed posture to the series, with comfortable proportions that support conversation, reflection and extended time outdoors. Single and double configurations create opportunities to unwind alone or together.

Care

Keeping spaces at their best.

The best outdoor environments are designed to be enjoyed, but also to be cared for. The 720 Waste and Recycling Container supports the everyday life of a space through durable construction, refined detailing and a form that feels naturally connected to the rest of the collection. It's an essential element that helps outdoor places remain clean, welcoming and ready for the experiences still to come.

720 Planters

Grow

Bringing the landscape closer.

Planting adds texture, color and seasonal change to outdoor environments. The 720 Planter gives that natural expression a defined architectural presence, helping frame gathering areas, soften hard surfaces and shape outdoor rooms. Used alone or in groups, it holds structure and life in balance.

Designed together. Experienced together.

No single product defines a place. The experience emerges through the way each element contributes—welcoming arrival, guiding movement, creating comfort, supporting gathering and bringing the landscape closer.

The 720 Collection unites these roles within one complete family. Consistent forms, considered details and coordinated materials bring clarity across the site, creating outdoor environments that feel connected, purposeful and enduring.

720 Collection

BACKED BENCH
ENDS: CAST ALUMINUM
SEAT & BACK: THERMALLY MODIFIED ASH & OAK WOOD
LENGTH: 6 FT

OPTIONS: END ARMS, CENTER ARM, PLAQUE, SKATE DETERRENT, WALL MOUNT, CANTILEVER
