

**LEXICON**

## Introducing a whole new personalized approach to site furnishing . . .

LEXICON's multi-functional modular components bring a full spectrum of inspiring choice to custom site furnishing.

Whether you're looking to encourage interaction, invite quiet reflection, or wrap around a tree, this elegant and maintenance-free new line will interpret your vision with style and superior performance.

Triangular or square modules create versatile angles and curves and can function as either side tables or stools. Want to add a bit of greenery? Remove the cover and you've created a planter.

Every site challenge brings a new opportunity for inspired design.

Whether you're looking for bold sharp angles or smoothly integrated curves, LEXICON takes your designs where you want them to go.

All LEXICON components combine aesthetics with durability for outstanding long-term value.

# It's about choice, not commitment.

LEXICON makes it easy. Use an array of easy-to-assemble geometric shapes to create your own curves and angles. Mix and match styles, surface materials, colors, and accessories.

Change your mind? Our unique assembly hook system allows you to rough in your design with ease before bolting it together. Want the option to change up your design in the future? The modular configurations you create can be easily updated to keep your site looking fresh or to meet changing site needs.
