

ROMA Sun Shade

Perforated to perfection

ROMA's flower-like form is inspired by the Vinca blooms that burst to life over the plains and hills of the Italian peninsula in early summer. Vinca may look light and delicate, but this powerhouse plant is robust enough to survive the Italian winter. ROMA follows suit, with a lightweight, all-aluminum construction that includes a structurally strong stainless-steel post that's snow load rated safe at 200+ lbs. Designed in collaboration with Gibillero Design, ROMA is available in two perforation patterns, is tamper-proof, fully recyclable, and comes in premium finishes that provide maintenance-free protection to thrive through every season.

SQUARE SURFACE MOUNT

BASE OPTIONS

2x Stainless Steel Knobs

1x Stainless Steel Knob, with
1 Pin with Keyed alike lock (lockable)

1x Stainless Steel Knob, with
1 Pin with Keyed unique lock (lockable)

1x Stainless Steel Knob, 1 Pin (lockable)

SURFACE MOUNT OPTIONS

Sun shade base is available in square or round and comes with 4 (9/16") mounting holes for securing to base. Anchoring hardware (3/8" recommended size) is not included.

MOUNTING

When installing with a Maglin table, ROMA must be mounted to the table and the table mounted to a hard surface. If used with tables other than those offered by Maglin, ROMA must be anchored to one of our two surface mount stands.
